

3-Sensor Caliper

Description

The Three-Sensor Caliper is a downhole, production logging tool used to measure the inside diameter of a wellbore. Three sensors, connected to three equally spaced arms, measure the diameter of the well. These measurements allow operators to gather information regarding the condition of the well. Data from the tool indicates the presence and inside diameter of restrictions or out-of-round conditions in a wellbore.

The tool is designed to pass from a large diameter to a smaller diameter while logging down. It can also log up to a small diameter restriction without locking up the arms.

Main Features

- Measure inside diameter of a wellbore
- Sensors connected to three equally spaced arms provide well ID measurement
- Arms move independent of each other to allow for most accurate reading
- Condition of a well can be extrapolated from measurements
- Tool data indicates presence of restrictions or out-of-round conditions
- Designed to pass from large to lesser diameters while logging down or up without locking up the arms
- 0.2 in. (0.5 cm) resolution
- 1.625 in. - 11 in. (4 cm - 28 cm) measurement range

Specifications

Specification	
OD	1.375 in (3.5 cm)
Length	60.375 in (153 cm)
Weight	16.2 lb (7.32 kg)
Temperature Rating	350°F (177°C)
Pressure Rating	15,000 psi (103.5 MPa)
Resolution	0.2 in (5 mm)
Measurement Range	1.625 in - 11 in (41 mm - 279 mm)
18V Power Requirement (Memory String)	105 mA
100V Power Requirement (Telemetry String)	53 mA

Accessories

- Caliper Calibration Plate: PM403AA0011

Part Number:

Standard Service: AM016WA0001

H2S Service: AM016WB0001
