

## 0.75" Piezo Inconel Pressure Gauge

### APPLICATION

DataCan's 0.75" Piezo Inconel Pressure Gauge is our standard permanent gauge that delivers pressure, temperature and vibration (optional) readings in sour applications. It is used to provide continuous, real time data about downhole conditions, helping increase productivity throughout the life of the well or reservoir. The gauge operates at pressures up to 15,000 psi and temperatures up to 150°C. The gauge is characterized by its electron beam welded sensor, feedthru and housing bodies. It has hermetically sealed electronics and a dual protection metal to metal seal design that prevents leaks from entering, all of which makes it very reliable.

### FEATURES

- Fully Welded Construction
- Hermetically Sealed
- Dual Protection Metal to Metal Seal Design
- Corrosion Resistant NACE MRO175
- Dual Axis Vibration Sensor Option - Capable Of Monitoring Pump Wear

### BENEFITS

The 0.75" Piezo Inconel Pressure Gauge is quick and easy to install and produces high quality well or reservoir data in real time. Its fully welded construction, dual protection metal to metal seal design, and hermetically sealed electronics, make it a very reliable gauge.
