

Portable Acquisition System

Application

The Lee Specialties Portable Data Acquisition System comes in a waterproof military style case with embedded wheels and sturdy grip carrying handles for easy maneuvering. This system is fully customizable to meet your needs.

Benefits

The Portable Acquisition System is a more compact option, in a durable, transportable case. It can be relocated in truck or skid and is capable of full wireline logging operations, requiring only 120VAC power and connection to wireline.

Features

- Waterproof Military Style Case
- Fully Customizable
- Common Configuration Includes: DSP Panel, Power Supply, Thermal Printer, and Laptop Computer
