

The screenshot displays the TestGas Download Software 3.0.0 interface. The main window features a graph titled "Graph Title:" showing two data series: Pressure (blue line) and Temperature (red line) plotted against Time (seconds). The Y-axis ranges from 0 to 1000, and the X-axis ranges from 0 to 1800. The graph shows a complex pressure profile with several sharp peaks and a temperature profile that remains relatively stable around 20-30 units. Below the graph, a table displays data points for Pressure (kPa), Temperature (°C), and Events. The table has columns for "Request Time (ms)", "Pressure (kPa)", "Temperature (°C)", and "Events". The data points are as follows:

Request Time (ms)	Pressure (kPa)	Temperature (°C)	Events
1.000000	12.040	20.000	
1.000000	12.040	20.000	
1.000000	12.040	20.000	

The interface also includes a menu bar (File, Configuration, Utilities, Help), a toolbar with icons for Information, Program, Download, Graph, and Reporting, and a status bar at the bottom with a search bar and system icons.

The DataCan Memory Logging Software merges downhole data with depth to create individual passes. The depth passes are loaded into Premier Logger to compile a complete report including depth correction, overlays, mark up, and shading traces

- Plot data versus measured depth or true vertical depth (TVD)
- Use reference passes and depth markers to assist with depth control
- Export/Import data to various file types including LAS, and TXT files
- Easily merge separate logging passes or LAS data into one complete
- Ability to markup log passes
- Log Track presentation is customizable
- Simple and accurate real-time depth adjustment
- Put logs on depth by stretch correcting passes separately
- Generate PDF and TIF file through Log Composer
- Shade data traces from/to a particular position in the track
- Drag and drop for ease of use
- Use with other Premier Software features to create reports, including Cement Bond Log, Noise Temp Log, and Perforating Record

DataCan Software

Description	Part No.
Program, Download, Graph, Reporting, Manual	100872
Guage Communication Cable_USB to 4 Pin Lemo	100682
Guage Communication Cable_USB to 4 Pin Military	101007

Specifications

Compatible with any Windows supported device
