

10W Dual Piezo

Application

PCP monitoring with DataCan's Dual Piezo Pressure Tool delivers pressure, and temperature readings for both the pump discharge (tubing sensing) and intake (annulus sensing).

Benefits

The Dual Piezo Pressure Tool is easy to install and produces high quality reservoir data in real time. It's fully welded construction, dual protection metal to metal seal design, and hermetically sealed electronics make it a very reliable product. Since this tool can simultaneously measure both tubing and annulus pressure, it helps reduce the cost of the permanent system while increasing reliability.

The Crimp-y-doo, at the heart of DataCan's new gauge design, ensures correct wire prep and prevents the TEC conductor from pulling up into the armor. If you find yourself assembling a gauge without a crimp-y-doo, you just better crimp-y-don't!

Features

- High Accuracy and Resolution – Reservoir Data
- Fully Welded Construction – No O-Rings
- Hermetically Sealed
- Dual Protection Metal to Metal Seal Design
- Corrosion Resistant NACE MR0175
- 1 Second Sampling
