

LineWise

System and Software

Application

The Winch Control System works with the tension measurement in LineWise to prevent overtension damage to wireline and the possibility of backspooling damage to the wireline. The user can set overtension and undertension limits and adjust these parameters on the go.

Benefits

Prevents damage to Wireline Prevents damage to winch and draw works

Features

- Stops winch when exceeding overtension
- Can be configured to stop when tension is too low (bridge or backspool)
- User adjustable limits
- USB connection
- Relay or Solenoid actuation

Ordering Information

Description	Part No.
Winch Control Box_Assembly_Standard	AE308UU0001
Cable_Harness_Assembly_Winch Shutdown Controller_Relay	108041
Relay_SPDT_12VDC_35A_w/Bracket (Winch shutdown actuation)	PE450UU0004
Power Supply_AC-DC_12V_1.5A (Supply for Winch Control Box)	PE171UU0059
